Preparation Instructions

For the participants of Cindy Drozda Signature Workshops

Subject: Finial Turning Intensive

Workshop Goals:

My main goal for all of my workshops is to help members of the Woodturning community to become better woodturners and artists. I do this through sharing the methods, techniques, and design philosophy that I use in my own work.

Another goal is to give participants the experience with me that they are looking for. For many, that is to take home a piece of my signature work that they have made.

You are to be congratulated for your willingness to learn from me! It is through exposure to other turners that we all share and grow, as individuals and as a group. Your turning and artwork will improve as a result, no matter what your turning experience level at the moment. I attend other turners' workshops whenever I can. I always benefit from learning different ideas and ways of doing things.

This is your opportunity to step into my shoes, and experience the ways that I do my work. Everyone does things differently, and you may or may not decide to incorporate my ideas and methods into your own work. Having exposed yourself to new methods, processes, and philosophies will make you a better turner. You will have more options and more "tools" available for doing your own work.

Subject:

The subject of this workshop will be my signature style of Finial turning.

We will perform cutting exercises to introduce the 3 basic cuts that I use for my Finials, and will then use those cuts to create finely detailed finials.

Participants will learn my philosophy on Finial design and proportion. They will create their own Finial designs, and will leave class with one or more Finials to mount onto a vessel, box, lidded bowl, or ornament.

Shaping and sharpening of the tools used will be addressed as time allows.

This workshop will take your Finial turning to a new level of fineness and detail!

Class Structure:

My workshops consist of short demonstrations of each step in the project, followed by time for the participants to complete that step.

The focus will be on completing the process as a group, and learning some techniques along the way. I do not recommend spending a lot of time sanding and finishing.

We will have a morning session, a lunch break of about 1 hour, and an afternoon session. At the end of the day, we will leave the shop as clean as we found it. Hours of class will vary, depending on the facility that we are using. Usually, we spend a 6-7 hour day working at the lathe.

Please contact your club's representative for the hours of your class, and any other specific details.

Turning Experience Required:

This workshop is the lesson, not the final exam! Your performance in class will not be graded or judged. We all learn at our own level and our own rate. It is the nature of clubs and guilds that the workshop participants will be at different levels. It's my job as instructor to challenge everyone at their level. All skill levels are welcome, though some turning experience is highly recommended.

Technical Preparation:

You should be "current" with your own tools and methods. In other words, it will be better for you if you have turned something recently and are reasonably comfortable with what you currently do.

You don't need excessive practice, or instruction, to prepare for this workshop. The best time to schedule time in your shop to practice is the weeks following the class, when you can put into action the ideas and methods that you learned, and make them your own.

A good preparation is to view my "Fabulous Finial Box" DVD to familiarize yourself with the project.

What to Bring to Class:

1 – Safety eyewear, face shield, or goggles. This is important. Eyeglasses don't count unless they have protective side shields and ANSI spec safety lenses.

2 - You do not need to bring wood. All of the wood will be provided.

3 – Tools (list below) and any sharpening jigs that you like to use.

4 – Sandpaper and finishing materials if you intend to finish your project.

5 – A piece or two of your own finished work to show.

6 – Your specific goal for this workshop.

7– To get the most out of this workshop: Please bring an open mind and willingness to learn!!

Suggested Tool List:

I will be bringing extra tools to share, so if you don't already own some of these tools don't worry. Just bring what you have. It is a good idea to attend the workshop, and see if you want to do this work in the future, before buying new tools.

Important:

**Face Shield or Safety Glasses – everyone must protect their eyes in this class!
(regular eyeglasses don't count unless they have side shields!)**

3/8" (or 1/4", or 1/2") Bowl Gouge

3/8" Spindle Gouge

Skew chisel 1/2" or 3/4"

Bedan or scraper for making chucking tenons

Parting tool (preferably **not** a "diamond") 1/16" - 3/16"

small scroll chuck with "standard" or "pin" jaws. (preferably not a large chuck with "pin" jaws)

Tailstock center with removable point, small cup center, or OneWay-type revolving tail center

Notepad & Pencil

Optional:(bring if you have them)

Roughing Gouge – 3/4" or larger

smaller and/or larger bowl and/or spindle gouges

Bedan tool

thin parting tool 1/16"

smaller jaws for scroll chuck

binocular magnifiers or reading glasses (to be worn **with** your safety glasses of course)

Center finder

Ruler

Awl

Dust Mask

sandpaper and finish if you plan to sand and finish your project(s)
