Greg Dahl “the burl hunter” <https://oregonburls.com/> Maple burls

01:03:54 George Kabacinski: my audio is fine

01:03:56 Maryalice Birk: Ernie, my sound is fine

01:04:53 Dave John: What do you advise on minimum tenon depth

01:08:58 Nick Jankowski: it seems as there is considerable space between the jaws...

01:14:16 Pablo Gazmuri: Do you ever use the band saw to separate the top from the bottom and keep better grain match?

02:04:55 Paul Johnson: What was the brand of flexible sandpaper disks ?

02:16:53 Richard Carney: will you be finishing the lid today ?

02:21:18 Milt Roth: you should use sand paper as though someone else is paying for

02:27:47 Mike Gable: Do you orient the grain direction of the inlay the same as the box ?

02:40:15 Bob Ohle: Why not CA glue?

02:42:43 Juanita Baril: which Titebond do you use?

02:42:54 Scott Hampton: CA becomes brittle over time, whereas wood glue will last much longer.

02:44:29 Milt Roth: Epoxy? and you can color it with Mica powders

02:45:11 Scott Hampton: Epoxy works great, but takes longer to cure.

02:48:24 Nick Jankowski: do you use sanding abrasives such as Yorkshire Grit?

02:50:47 Scott Hampton: The problem I found with abrasive pastes is that you need to remove every last bit of the paste or it will affect the finish in a bad way.

02:50:53 Julian Crow Valley: 3 sided point tool in the UK

02:52:03 David: Could you use a D-Way beading tool to create the bead?

03:18:13 Amy Baumgart: what elegant tool control!

03:20:04 George Kabacinski: Do you just eyeball the curve or would you normally compare it to the box top?

03:28:09 George Kabacinski: Does the Southerland Wells have a longer shelf life than Waterlox??

03:28:56 Don Prorak: I also like Rockler's Maloof mix finish - similar to Waterlox.

03:31:19 Nancy Holmes: Equal parts of bees wax and turpentine that have melted together and then mix with equal part of Waterlox.

03:31:40 Fred Grosse: What is a while - how long do you wait normally before wiping off?
