01:46:19 Maryalice Birk: <https://woodturningtoolstore.com/product-category/lathe-accessories/>

01:46:48 Tod Raines: I believe it is the 2.5" Elio drive

01:47:10 Corey Graham: why a bowl gouge versus a roughing gouge?

01:47:19 Tod Raines: Thanks Maryalice

01:47:51 Maryalice Birk: Guess it's time I ordered an Elio drive.

01:49:04 Tod Raines: The 2" Elio drive is currently out of stock. 2.5" are in stock

01:51:26 Cynthia Gibson: Sharpening Gouges: <https://youtu.be/rhEwtRlkNA>

01:53:44 Dave Hawley: Cynthia - is the "Sharpening Gouges" YouTube a Cindy video?

01:54:04 Cynthia Gibson: yes

02:00:53 Norm Olsen: No straight lines in nature

02:16:27 Karen Drennen: Could you make a jam chuck with collets?

02:16:38 Dave Hawley: Craft Supplies USA has a smooth exterior "Shark Jaws" Vicmarc jaws like she is using - 104-603 or 104-604 in their catalog - \$115 or so.

02:21:11 Haim Matza: <https://www.axminstertools.com/us/axminster-woodturning-chucks-cylinder-jaws-50mm-310425>

02:25:29 Norm Olsen: Nice tip - sure saves excitement of blindly going in.

02:34:22 Cynthia Gibson: Sharpening Negative Rake Scrapers: <https://youtu.be/uZ5kqiT3FE0>

02:37:27 Mike Mitchell: I missed... what is your diameter of the tenon for those deep jaws?

02:40:14 Dave Hiller: Interesting to note that using the measurement of the diameters of your two ogee circles from my screen, I get a ratio of 1.625 which is very close to 1.618 golden mean.

02:40:40 Corey Graham: do you have a backup during presentations incase you end up with a funnel?

02:42:55 Corey Graham: also huge fan. i wish i had lots of tools.

but i've made hollow christmas ornaments and goblets by backhollowing with a spindle gouge

02:43:31 Norm Olsen: Do you know the make of your headset? It seems to have great sound.

02:44:43 John Singleton: how long are those jaws

02:45:10 Norm Olsen: It is excellent. Thank you

02:46:07 Corey Graham: what's your view on resin or hybrid forms?

02:46:27 George Kabacinski: he is really good to deal with.

02:48:05 Dick Koch: What size is that chuck?

02:48:39 Dave Hawley: Cindy said she was using a Vicmarc VM-120

02:48:57 John Smythe: Mike Hosaluk makes those tool holders-

02:51:56 Marc: could you repeat the recommendation on connecting the curves?

02:52:26 Norm Olsen: Thanks Tod.

02:53:43 Gary Beers: So what other new tools/toys did you get lately? :)

02:53:56 George Kabacinski: I've been poking around on-line. I do not find the chuck Cindy is using today. The VM120 in today's world has a hex shape key rather than tommy bars. Maybe I'm just missing something.

02:53:58 Marc: sorry - the gentleman made a remark - you said you may have done it instinctively ...

02:54:50 Dave Hawley: Older version of the VM120.

02:55:47 Corey Graham: at my local club i've had people asked what measurements i use but i don't use any, just eyeball it. when i try to measure it exactly it looks funny

03:01:08 Carl Brust: I missed when you were talking about the Thompson deep flute V gouge is it the half inch?

03:02:04 George Kabacinski: Virmarc still has the VM90 tommy bar chuck. The VM90 is the same size (and jaws) as the MV100. It's the VM120 size that doesn't seem to be available in the tommy bar version. Of course, there's the monster VM150 which you never know what to use with it! LOL

03:03:22 George Kabacinski: VM150 is PINTA. Plus you need a chain hoist to get it on the lathe since it is so heavy. LOL

03:13:47 Mike Mitchell: Your eye was working great! Nice form.

03:15:10 Doug Drury: What speed do you slow down to for sanding
03:15:43 Rick Auge: if it doesn't get in the way, blue painters
tape over (outside) end grain helps improve the vacuum
03:20:06 Edgar sims: What's type of connection do you have for the
vacuum through the lathe arbor?
03:22:43 John Smythe: can you use different live center that fits
over tenon?
03:23:27 Gordon Gilomen: Try a pen turners mandrel saver .
03:24:16 Marc: maybe create a divot on tenon before removing. To
index if you have to put back on ...?
03:24:47 Jacque (Jack) Jecker, Victoria, Texas: Mandrel saver is
hollow so the mandrel shaft fit inside of it.
03:25:36 Gordon Gilomen: A reverse cone with 1/4" hole in it.
03:26:11 Chukk Browder: Is the sandpaper a H&L disc that you cut?
03:26:12 Marc: Perfect - thx!
03:26:34 Marc: Your knowledge is worth paying for :)

chuck adaptor. That particular adaptor also fits the nova DVR. JT
makes adaptors for all lathes.

04:32:51 paul grainger-allen: That's eye ball

04:34:11 Marc: HI Danny - means to do your "best guess" at size
